

# Virtunet

## CLOUD PORTFOLIO

### Are you looking to bring the advantages of the Cloud to your organisation?

With the Virtunet Cloud solution you will be able to create a Zero Downtime work environment and a highly collaborative, productive and mobile workforce, while reducing your capital expenditure.

## THE SOLUTION DELIVERS

- 21% average annual savings for users who move applications to the cloud
- Zero Downtime
- Reduce data loss and your hardware storage requirements
- The Virtunet Cloud Portfolio caters for small, medium and enterprise customers through the use of high quality billion dollar Data Centres
- Provide greater control to your IT team with improved licensing management, security policy enforcement and asset inventory whilst reducing deployment and reporting costs

### What is the Situation?

- Managers and Customers expect Zero Downtime
- 82% of companies reportedly saved money by moving to the cloud
- Staff want access to data 24/7 and the latest versions of applications
- 80% of cloud adopters saw improvements within 6 months of moving to the cloud
- 90% of all businesses that lose their data from a disaster are forced to shut down within two years

### Your Challenges are:

- IT teams are required to do more than ever. Getting more responsibilities within the organisation without the increased staff levels required
- Newspaper stories of Data Centre failure from cheap operators
- Large amounts of data held onsite
- Multiple staff have many different responsibilities to cover the complete range of products

# VIRTUNET CLOUD PROCESS

Work with our licensing team to provide details on your current infrastructure and licensing usage including upgrade lifecycle **1**

Virtunet will put together a plan for how your company can take advantage of the cloud **2**

Virtunet will setup your Virtunet Customer Portal. Through your personal login, see all your current license information and prepare budgets for your future requirements **3**

Upgrade to the latest Microsoft Office suite with 70% off and reduce overall licensing requirements. With 5 devices including iPad's, each user can install the Microsoft Office Suite. Improve productivity and reliability for your staff with access to all the latest versions of your Office applications. Have the ability to store your data on your local area network and reduce administration through quick deployment and management features.

Adobe Creative Cloud

More than a million subscribers are taking advantage of Adobe Creative Cloud for Teams in it's first year. Get \$25,000 worth of products at a single subscription with access to products such as InDesign, Photoshop, Illustrator, Acrobat Pro and many more. Your staff improves productivity through increased collaboration and your IT staff improve your deployment through the Adobe VIP portal. Available to be installed on your iPad's and other tablets.

Business and financial management teams have Zero tolerance for Downtime. StorageCraft cloud brings protection for your business critical applications with the ability to get up and running within 5mins, in the event of a catastrophic situation. Test updates on your servers before deployment and find lost files or emails in minutes. StorageCraft Cloud builds a safer and more efficient working environment.

Absolute Manage MDM Cloud is compatible with Windows, Android and Apple devices and provides configuration and asset management with the ability to implement security policies. Protect the information outside your firewall and provide an environment for guest users without compromising company policy.

Based on VMware vSphere, vCloud Suite provides all components for building and running a private cloud infrastructure. This architectural approach delivers virtualized infrastructure services (compute, network, security and availability) with built-in intelligence to automate the on-demand provisioning, placement, configuration and control of applications based on defined policies.
