

BUILT TOUGH, FOR THE
SCHOOL OF
HARD KNOCKS

LEADERS IN LAPTOP PROTECTION FOR OVER 25 YEARS

Targus®

Why choose TARGUS for your school

Targus have been supplying cases to Australian schools since the early 1990s, which have been specifically designed for student's needs. Toughness, reliability, high quality and affordability are the hallmarks of Targus designed student laptop carry cases.

1

Pioneers of the Laptop carry case category. Committed to working closely with schools, corporations, education resellers and leading manufacturers like ACER, APPLE, DELL, HP, LENOVO and TOSHIBA.

2

Targus education cases provide superior protection to laptops, during recent trials the T.A.N.C.™ out performed its competitors in drop and compression testing.

3

A safe choice with an extended 3 year warranty for the T.A.N.C.™ case and an extended 2 year warranty for all other cases*.

4

Celebrating more than 25 years and still the # 1 Best Sellers for laptop accessories & cases**.

5

Targus offers a wide variety of education cases with different levels of protection to suit all levels of needs

ORBUS™ HARDSIDED LAPTOP CASE

Step into style with our unique hard-sided case, the Orbus. It is ideal for use as a protective cover for your laptop as well as a lap desk when you are on the go. The hard finish EVA* outer shell acts as a protective barrier while the interior is lined with a unique foam construction system to safeguard your laptop from damage. The interior bubble construction also aids in the ventilation of your laptop while in use.

- Lightweight & Durable
- Laptop can be used inside the case
- Detachable, adjustable, padded shoulder strap for easy carrying
- Four internal corner elastic straps to secure your laptop while in use
- It can also easily fit inside another case or backpack

T.A.N.C™ 3.0 EDUCATION CASE

By absorbing shocks, bumps and drops, this case doesn't just prevent laptop screen and other damages, it minimizes the need for laptop repair - and ensures learning time isn't interrupted. This is the highest evolution of our original case.

- Patent pending T.A.N.C. protection system designed and engineered in Australia
- Clever ejection system to retrieve laptop easily
- Handles and removable shoulder strap for easy carrying
- Extra corner protection to lessen wear-and-tear
- ID/Name card holder window on back
- Accessories pocket for adaptor/or USB
- D-rings for personalization or attaching a name tag
- Heavy-duty zip around opening for easy access

CONTEGO™ ARMOURED SLIPCASE

Contego, which means to protect in Latin, is our newest addition to our education range. The Contego is built to offer protection without adding weight. The slipcase has a built-in retractable handle which can be pushed back and lies flat when not in use. This slim and sleek designer slipcase comes with a side opening for quick access.

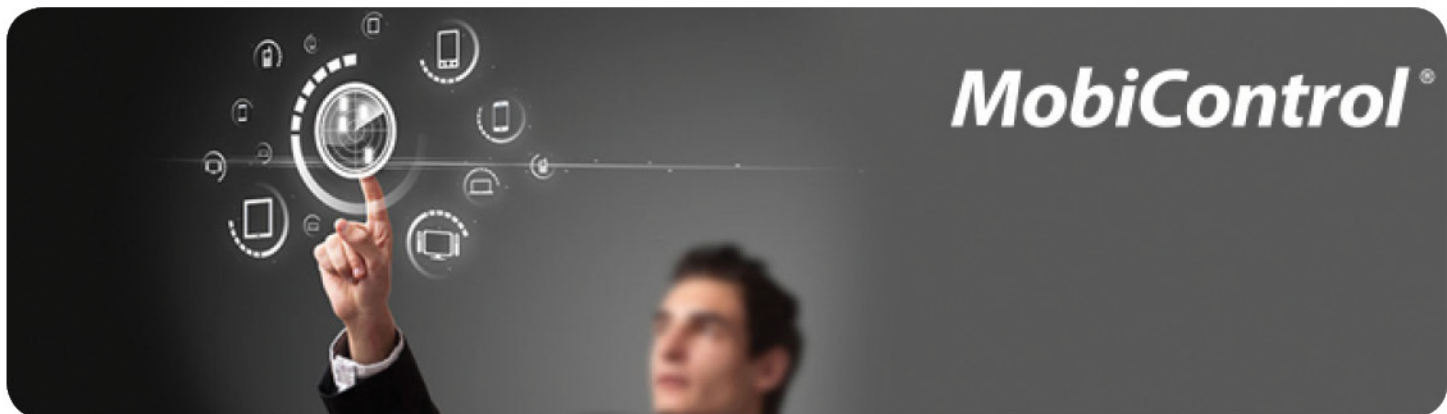

- Lightweight & Durable
- Fully reinforced front and back panels to offer the maximum protection
- Soft interior lining to protect your laptop from scratches
- Retractable handle which can be stowed away when not in use
- Side opening for quick and easy access

GS HARDSIDED LAPTOP CASE

Made from durable moulded EVA* the GS Hardsided case offers extra protection for your laptop. Lined with soft Nyflex material to protect your laptop from scratches. The trendy yellow and silver reflective colour combination stripe adds an element of sunshine to the seriously protective case.

- Lightweight & Durable
- Handles for easy carrying
- A padded, adjustable, removable shoulder strap for alternative carrying
- An accessory mesh pocket for small items such as USB stick
- EVA hard-sided exterior with a soft Nyflex interior

MobiControl®

SOTI MOBICONTROL FOR EDUCATION

Mobile Device Management for iOS, Android and Windows 8 devices.

Engage your students with secure content and applications.

Content Library and Classroom App Catalog allow students to benefit from secure access to approved content and applications to improve their learning through customized and up-to-date curriculum.

Promote focused learning in and out of the classroom.

Active Learning Mode replaces the device's home screen with a customizable interface, providing a focused environment for educational applications to improve student and teacher engagement.

Encourage responsible use and enforce acceptable use.

Secure Web Browser and Categorized Web Filtering ensure students are utilizing their mobile devices specifically for academic purposes. Enforcing Acceptable Use Policies (AUP) removes the threat of objectionable content or applications.

Intelligently track devices according to location.

Geofencing (Location-based policies) provides accurate device tracking of lost or stolen devices, and even the ability to restrict content or applications dependent on the device location. Apps can be controlled while on or off school property as per school policies.

Real time assistance anytime, anywhere.

Help Desk and Remote Control enables one-on-one remote learning, providing targeted lesson plans for students so teachers can easily assess student performance or assist with any problems. Administrators can also help teachers ensure classroom devices remain online and in good working order.

Advanced reporting and analytics for at-a-glance asset management.

Real Time Reporting can keep track of valuable mobile devices or assets that have been distributed to students and faculty. Robust reporting and analytics is also available in an intuitive web console, making it seamless and easy to protect your investment in mobile technology.

Absolute[®]Software

TRACK. MANAGE. SECURE.

Absolute Computrace[®] allows organisations to centrally track and secure their IT assets within a single cloud-based console – the Absolute Customer Center. Using hundreds of data points collected from each device, IT administrators can monitor potentially suspicious devices and remotely invoke pre-emptive or reactive security measures to safeguard each system and the corporate data it contains. Product features include:

Asset Administration

Collect incredibly accurate and comprehensive information from each device. Then create customised policies and alerts to be notified as soon as an unauthorised change is detected.

Data & Device Security

Remotely delete sensitive data on missing computers including an audit log of the deleted files to prove the data was removed from the device. Freeze a device with a custom message to the user. Access and retrieve files regardless of location.

Geotechnology

Track assets on an internet map including current and historical locations. Build geofences to contain a device and receive an alert if it strays. If a device is not where it should be, investigate and determine if further action is required.

Endpoint Forensics

The Absolute investigations & Recovery team can forensically mine a stolen computer over the internet using key capture, registry and file scanning, geolocation, and other investigative techniques to determine who has the computer and what they're doing with it, including whether any data was accessed post-theft.

Theft Recovery

At customer's request, the Absolute Investigations & Recovery team will work closely with local police to recover a stolen device. They successfully recover thousands of devices each year.

LoJack[®] for Laptops by Absolute Software provides consumers with the power of the Computrace technology so they can remotely manage a computer regardless of its physical location. In the event of theft – Absolute can track, locate and recover stolen computers while providing users with the ability to secure their device and the data it contains – protecting their privacy and safeguarding against identity theft. Product features include:

Data & Device Security

Protect privacy by remotely deleting information from a missing computer including files and applications, personal photos, internet bookmarks, browser cookies, financial information, and stored passwords. Limit access and communicate with the person using the computer by remotely freezing the computer and displaying a custom message.

Theft Recovery

At customer's request, the Absolute Theft Recovery Team will forensically mine a stolen computer over the internet using key captures, registry and file scanning, geolocation and other investigative techniques to determine who has the computer and what they're doing with it. Then they will work closely with local police to recover it. They recover thousands of stolen computers every year.

smoothwall

DEVICES IN THEIR HANDS, CONTROL IN YOURS

The number one way to protect your students online

Smoothwall's filtering solutions allow you to filter web access across mobile devices on your Wi-Fi network without compromising on flexibility. Blurring the lines between mobile devices and traditional desktops, you can build policies specific to individual users and devices.

Unlike other filters, Smoothwall's Secure Web Gateway (SWG) and Unified Threat Management (UTM) products offer BYOD users our full suite of web filtering features. Where we protect your desktops and laptops from malware and inappropriate content, we protect your mobile device users too.

- Filtering across Android, iOS, Windows Phone, BB and more
- Policies customizable to individual users, times, and locations
- Single Step Authentication (available on UTM products)
- Protection from web-borne Malware
- Anonymous Proxy blocking
- Full reporting on users' web activity
- Control of Public Wi-Fi access

Recognises inappropriate content where
Sites have not been categorised

Multilayered review of the actual content
Including block-lists for illegal

Monitor user activity in real time

Create classes of users or set up profiles
for individuals

Smoothwall solutions Support:

CREATIVITY

in teaching & learning

- Allow teachers to access the resources they need to teach, including YouTube for Education
- Allow flash content without worry Read-Only Facebook support allows access to the resource - without the timewasting.
- Reduce IT support load with blocklist control at classroom-level (SWURL)

SECURITY

for student & staff

- Prevent access to inappropriate material Stop Malware, including 'Zero-day' attacks at the gateway
- Stop the Anonymous Proxies used to bypass your filtering policies
- Generate custom reports on user behaviour and bandwidth usage

FLEXIBILITY

to create the web
you want

- Bring Your Own Device support for laptops, tablets, smartphones and more
- Reports are accessible by designated staff members on custom portal pages.
- Prevent any disruption in the use of VLEs and cloud learning tools
- Licencing model that support BYOD and mobile device usage

END-TO-END IP SURVEILLANCE SOLUTIONS FROM D-LINK

D-Link was chosen by the NSW Department of Education in 2013 to provide IP Surveillance to 31 schools throughout NSW.

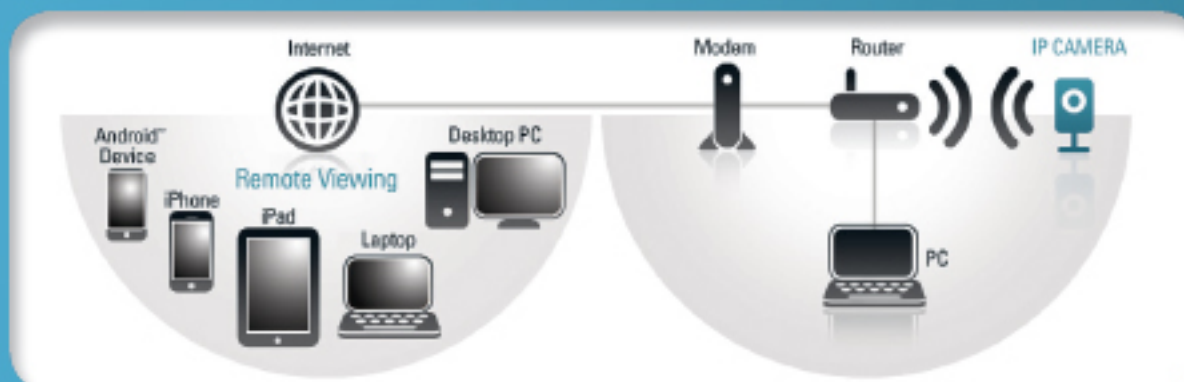

So what exactly is IP Surveillance?

IP Surveillance is based around IP Camera Technology. Effectively a CCTV (Closed Circuit Television) camera that uses the Internet Protocol (IP) to transmit image data and controls signals over an Ethernet or Wireless Network.

What are the benefits?

REMOTE ACCESS - Send alerts and viewing on portable devices anywhere and at anytime.

WIRELESS

Easy-installation and allows placing of the camera anywhere within different size school grounds.

INCREASED SECURITY

Increasing productivity and safety whilst deterring vandalism and violence like bullying to provide the safest possible learning environments for students, teachers and visitors.

LOW COST

Simple, flexible, low maintenance solution for all school budgets, all controlled at your fingertips.

Call now to register for a **FREE Professional School Site Survey** valued at \$2,000. (Subject to availability. Terms & Conditions apply.)
