iPad, a powerful way to inspire, create, and learn

Apple iPad for EDUCATION

Apple iPad

Students love learning with iPad's because it's so easy to use, mobile, and powerful. Combined with iOS 11 and amazing educational apps on the App Store, iPad Pro, iPad, and iPad mini 4 are full of ways to inspire creativity in every student.

Apps are available on the App Store. Title availability is subject to change.

1Data plan required. Check with your carrier for details. Speeds will vary based on site conditions. 2Battery life varies by use and configuration. See www.apple.com/batteries for more information.

Professional Learning Opportunities

Key Points On the Professional Development Day:

Apple iPad Learning Experience

For Schools wanting to trial the use of a 1:1 iPad environment, the two week iPad Learning Experience integrates Apple's Core Applications in all facets of the curriculum during the program e.g. Coding and Robotics, Creative Content Creation, and Podcasting & Music Creation with Garageband.

Apple Teacher

As an educator, you're always looking for new ways to provide learning experiences that expand what's possible in the classroom. Be inspired by tips, learning materials, and real stories about Apple products being used in amazing ways. Build skills on iPad and Mac that directly apply to activities with students and explore new ideas to create more engaging lessons

Accessibility Features on Apple Devices

Apple has taken great steps to ensure that everyone can access and use iPad and Mac devices to create content regardless of their diverse abilities and needs. The vast majority of teachers lack the knowledge of Apple's in built accessibility features and the school support staff benefit from assisting students with specific needs through these intuitive inclusions.

Mac and iPad Bootcamps

Particularly favourable at the beginning of the year, the Mac and iPad bootcamps ensure that teachers and students are utilising all the features of their device to maximise their learning experience.

Apple Device Management for Schools, Colleges and Universities

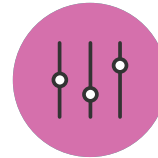

DEPLOYMENT

Provision the perfect Mac, iPad or iPhone for your users. Choose a zero-touch, hands-free experience or go hands-on through imaging. Either way, enrol devices and deploy them with ease.

DEVICE MANAGEMENT

Ongoing management is the bread and butter of IT's daily activities. Go beyond configuration profiles and use policies and scripts to customise devices for the optimal user experience.

APP MANAGEMENT

Put apps in the hands of users. Purchase apps in bulk through VPP and choose your deployment method, making them available automatically or through a Self Service catalogue. And, before you do, pre-configure apps with the settings users need.

INVENTORY

Automatically collect hardware, software and security configurations details from your Apple devices. Create custom reports, alerts and manage software licenses and warranty records. Use inventory to automate ongoing management.

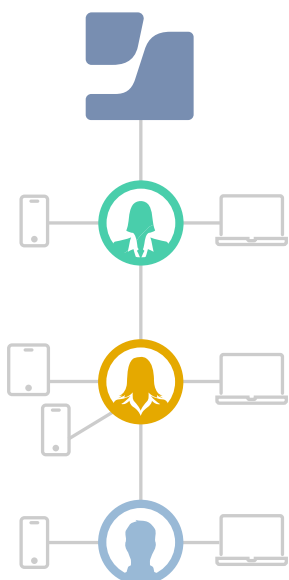

SELF SERVICE

Empower users with your own app store. Give them the ability to install apps, update software and maintain their own device without a help desk ticket.

SECURITY

Secure your Apple devices by leveraging native security features. Manage device settings and configurations, restrict malicious software, and patch all of your Apple devices without user interaction.

The Apple Experience

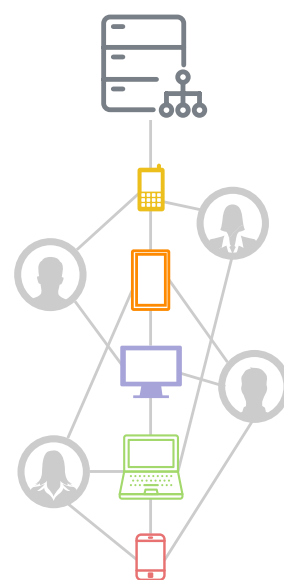

With Jamf Pro

- ✓ User at the centre
- ✓ Starts in the box
- ✓ Day Zero OS support
- ✓ Embrace Apple tech and services
- ✓ Embrace Apple native apps

The Other Experience

Unified endpoint management

- ✗ Device at the centre
- ✗ Starts with IT
- ✗ Upgrade when IT allows
- ✗ Lowest common denominator device
- ✗ MDM apps and containerization

APPLE iPad 9.7-inch

iPad

Power for what you do today.
And what you'll discover tomorrow.

Like a computer. Unlike any computer.

If the computer were invented today, what would it look like? It would be powerful enough for any task. So mobile you could take it everywhere. And so intuitive you could use it any way you wanted — with touch, a keyboard or even a pencil.

In other words, it wouldn't really be a 'computer'. It would be iPad.

APPLE iPad Pro

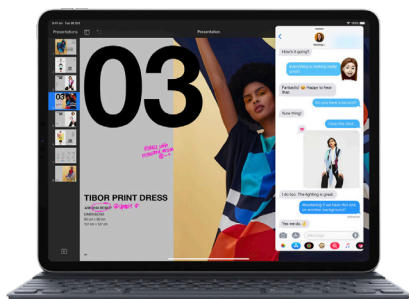

iPad Pro

It's all new, all screen and all powerful.

With the new iPad Pro, you get what you need from a computer, along with many incredible things you'd never expect from one. Here are a few reasons why your next computer might just be iPad Pro.

It's a computer that lets you do everything with touch.

iPad Pro does what a computer does, but in more intuitive ways.

Use multiple apps at the same time with a few taps. Move objects between apps simply by dragging and dropping, or switch apps with a single swipe.

APPLE MacBook Air

MacBook Air

Lightness Strikes Again

Even though it weighs just 2.75 pounds, the new MacBook Air packs quite a punch. An eighth-generation Intel Core i5 processor helps you power through daily activities, from reading email and browsing the web to creating Keynote presentations and editing in iMovie. Up to 16GB of memory lets you work seamlessly even with multiple apps open, while up to 1.5TB of SSD storage lets you launch apps in a flash and provides plenty of room for all your documents, photos, and videos.
